

ASSOCIAÇÃO PORTUGUESA  
DE CRIADORES DO CAVALO  
PURO SANGUE LUSITANO  
ENTIDADE DE UTILIDADE PÚBLICA

Dear Sirs,

Following to what was stated on the International Coordination Council meeting, held in the 20 June, in respect to the Directive communicated by APSL where is explained the mandatory presentation of the sperm Test Report, it was proposed by some of the presents at the meeting that the referred test could be send in later date to the day of the Approval.

Although it is our conviction that the presentation of the test in the day of the admission of males to the Adults book is the right procedure, we understand that, mainly due to the costs related, it may cause a difficulty for some breeders.

Therefore, we inform that the Board of Directors decided to allow a period of no later than 30 days (counting from the date of the Approval) for the presentation of the Sperm Test Report.

The failure of the presentation within the stipulated period will result in the nullity of the inspection. The breeder/owner will have to submit again the male to the Registration Committee, supporting all the costs inherent to it.

S. João do Estoril, the 16<sup>th</sup> July 2014

The President of the Board of Directors

Eng. Manuel Paim
